## DETAILED ACTION

### *Election/Restrictions*

1. Claims 21-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 4.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 5-12, 15-19, 31 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jonas et al. (U.S. 5,234,126) in view of Cheng (U.S. 5,549,210) and Kester (U.S. 6,129,803).

Jonas et al. discloses the claimed invention except for the plurality of feet at the bottom of the container, except for the side wall being a smooth continuous curve and except for the diameter being larger than the height of the bowl. Cheng teaches that it is known to provide a container with a plurality of feet at the bottom (see figures 1-6). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the container of Jonas et al. with the plurality of feet of Cheng, in order to strengthen the bottom wall of the container while providing a stable support structure.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the modified container of Jonas et al. with the side wall shape of Kester, wherein the side wall is a smooth continuous curve, in order to give the container a more decorative appearance.

Art Unit: 3727

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the modified container of Jonas et al. with the diameter being larger than the height, in order to allow the container to be stored in areas with limited vertical space while maintaining the capacity of the container, and since a change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

The Jonas et al. reference can resist deformation during a hot fill application, as set forth in col. 4 lines 45-60. The container is blow molded, as set forth in col. 14 lines 1-5. The container materials and disclosure of a multilayered article are set forth in col. 13 line 57 through col. 14 line 5.

4. Claims 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jonas et al. (U.S. 6,062,408) in view of Cheng (U.S. 5,549,210) and Kester (U.S. 6,129,803), as applied to claim 1 above, and further in view of Beck et al. (U.S. 6,062,408). The modified container of Jonas et al. discloses the claimed invention except for the lid being rotatably secured to the rim. Beck et al. teaches that it is known to form a container wherein the lid is rotatably secured to the rim. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the modified container of Jonas et al. with the container being having a lid rotatably secured thereto, as taught by Beck et al., in order to properly seal the container using a well known means.

#### ***Response to Arguments***

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. The new grounds of rejection were necessitated by the amendment filed July 12, 2004.

*Conclusion*

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
